

SOLAR SIMULATOR

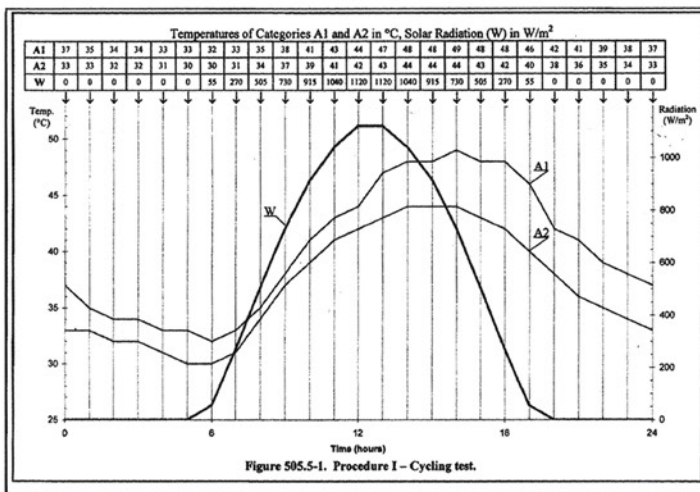

Welltech Solar Simulator is designed to simulate the sun's radiation for athletic training. With spectrum similar the sun, with radiation up to maximum 1200W/m²

The solar simulator consists of

- 1) Metal halide lamp
- 2) Electronic ballast power supply
- 3) LCD touch screen controller
- 4) UV filter
- 5) Pyranometer

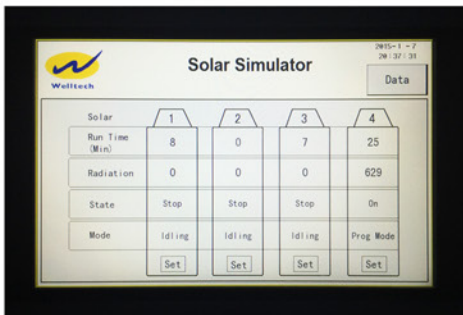

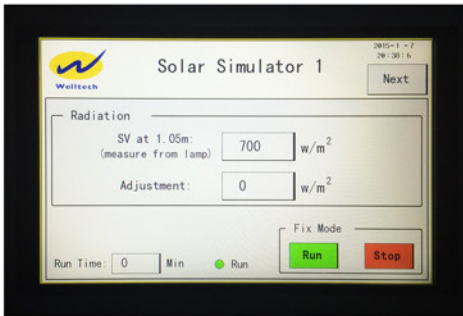

Features

- Radiation range : 400-1200W/m²
- UV index : <1
- Dimmable
- Digital Display
- Mode : Fix mode or program mode
- Display : Single lamp display or multi-display
- Storage : USB port

Application

- Simulate Sun radiation
- Athletic Training

Installation

- Ceiling mount
